Meet INOX

The INOX brand is an extensive product line of residential and commercial door hardware solutions supplying some of the most iconic projects in North America and around the world.

We believe in the beauty and performance of each architectural element.

Form Meets Function

We are experts in door hardware design, engineering, and manufacturing.

Door hardware is what people touch and feel when entering a property. These details make the first impression of the character of interior spaces.

We make it our mission to create extraordinary products that are as beautiful as they are functional.

Innovation

INOX is a leading manufacturer of sliding door locks, from the world's first barn door privacy lock to commercial-rated electrified sliding door locks.

These solutions provide secure locking mechanisms and attractive lever trims for spaces such as leasing offices, meeting rooms, and shared working spaces.

Creativity is thinking up new things.
Innovation is *doing* new things."
—Theodore Levitt

A Safer, Smarter Lifestyle

Access management made easy.

INOX Smart is the latest innovation in smart locks and access controls, designed and engineered specifically with multifamily, hospitality, and mixed-use in mind.

The ISM7000 battery powered smart mortise lock communicates through a user-friendly app using low energy Bluetooth technology.

Total Commercial Package

In addition to locksets, INOX offers a comprehensive door hardware package including hinges, closers, pulls, and other auxiliary hardware.

Manufacturing & Code Compliance

Rigorous testing, precision machining, and quality assembly result in the delivery of door hardware that will satisfy the requirements and exceed the expectations of your project. When artful design meets quality, technology, and craftsmanship, the result is a world-class product.

Engineered Beautifully

Whether you need beautiful, elegant trims from our custom engineering team or a small order of hardware accessories, INOX is here for you.

Contact us for more information on how we can help bring your interior design visions to life.
