

FORM MEETS FUNCTION

ARCHITECTURAL HARDWARE

Luxury lofts, resorts, timeshares, hotels and other mixed-use hospitality projects face a variety of challenges in the selection of door hardware. Architects and designers prefer elegant designs and finishes, but also need to meet Commercial building codes, including UL Fire Listing, ADA compliance, high frequency usage openings, and exit/panic devices. With INOX, you can have both Form and Function.

COMMERCIAL CONSTRUCTION FOR INTERIOR APPLICATIONS

“INOX[®] feels ‘bullet proof’ with all the upgrades, innovative designs that are long lasting and dependable.”

*Keene Cottle, Hardware Manager
Mountain Land Design (Salt Lake City, UT)*

TL4 Latch

- Grade 2 mechanical tested latch
- Lifetime mechanical warranty
- Latch stabilizing bracket
- No lever sag
- 28 degree latch retraction
- 3 hour fire-rated latch option

COMMERCIAL CONSTRUCTION FOR EXTERIOR APPLICATIONS

Offered in our

- MC7000 Series
- PD9000 Series
- XSF Trim for RIM and SVR Exit Devices

Features include

- Lifetime mechanical warranty
- Cycle tested 1 million times
- Three product applications

Exteriors: X-Series Trim Design

- Hardened knurled brass nut for mechanical integrity and strength
- Heavy duty wire torsion spring
- Threaded rose cover for easy installation
- Solid Stainless Steel lever, cast Stainless Steel sub-rose
- Passed 1 million cycle testing

PD9000
Sliding door locks

ED93
Rim and vertical rod outside trims

FINISHES COLLECTION

INOX's high-performance finishes are as tough as they are beautiful: more than color and texture, they are actually a blend of technique, material, and application processes that enhance durability and consistency and provide strength against abrasion, distortion, and corrosion.

INOX Standard Finish Stainless Steel 304 Grade

INOX PVD Finish Physical Vapor Deposition (PVD)

INOX Plated Finish

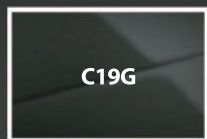

INOX CeraMax™

A new range of 12 vibrant color options that match, complement, and enhance your project with colors that pop and a finish that won't stop.

ASTM D4060 ABRASION

Test uses a 1000 gram Taber abrasive wheel rotating at constant speed. CeraMax™ finished "strong" and lasted nearly twice as long as nearest competitive finish and 24X longer than furthest competitive finish.

ASTM D2794 DURABILITY

Impact Resistance measured by placing coated panel in universal impact tester and dropping a standard weight, gradually increasing the distance the weight drops. CeraMax™ Graphite Black attained an impact strength measuring 160 inch-lbs, the maximum the test can measure.

ASTM D3363 HARDNESS

A weighted trolley with varying grades of pencil lead is placed on a CeraMax™ panel and pushed until a lead is found that will not cut through the coating. CeraMax™ Graphite Black achieved a 9h hardness rating, highest rating possible in the Pencil Hardness test.

ASTM B117 SALT SPRAY

Coated panels are placed in enclosed salt spray chamber in 95F temperature and subjected to continuous indirect spray of neutral salt water solution. CeraMax™ Graphite Black showed no corrosion.

COMPATIBILITY

INOX offers Compatibility
with door hardware from other vendors
